

What is Mixer?

Mixer is a service for streaming and watching live gameplay.

Do people really watch other people play games? We sure do – more than ten million people watch game streaming services every day. Top streamers are very entertaining people, talking about their reactions to the game and thoughts as they play. It's also fun to watch people who have professional-level skills take on competitive and action games. You can see how a game plays before you decide to buy it, or how different choices affect the gameplay.

Use Mixer to watch game streams on your Xbox One, on your PC, and on your mobile device. Mixer can also broadcast your own channel from your Xbox One or your PC, for free.

On your Xbox One, the Mixer hub is just to the right of Home. Check out some of the featured streamers, or look for games you're interested in.

On your PC or mobile device, go to mixer.com, or download the app.

To start your own broadcast channel on Xbox One, open the guide and go to **Broadcast & Capture**.
